

# P Chipbreaker

Ground Chipbreaker for Boring

Stable Chip Evacuation Towards the Outside of the Workpiece

Special ground chipbreaker controls direction of chip evacuation

The combination with Dynamic Bars provide better solutions for boring

Right-hand insert for right-hand holders

Left-hand insert for left-hand holders

\*WBET insert: Left-hand insert for right-hand holder

# Special Chipbreaker Shape Ensures Good Chip Evacuation Towards the Outside of the Workpiece

## Chip Control

### P Chipbreaker

### Conventional Ground Chipbreaker

Smooth chip evacuation towards the outside of workpiece

Clogged chips often occur due to chip flow towards the inside of the workpiece

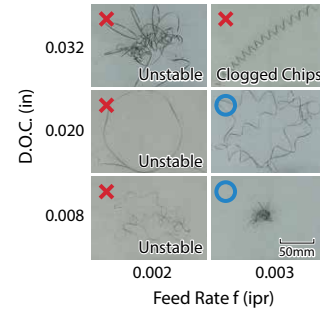

## Chip Control Comparison (Internal Evaluation)

### P Chipbreaker

Stable chip control

### Competitor A (Ground Chipbreaker)

Unstable chip control

Increasing cutting conditions causes clogged chips

Cutting Conditions : Vc = 330 sfm, Wet Workpiece : 304  
Inserts : TP □ □ Type

## Positive Inserts

Shape	Part Number	Dimensions (in)				Relief Angle	MEGACOAT NANO	
		I.C.	Thickness	Hole	Corner-R (rε)		PR1425	PR1535
